

Master Coaching's Nurturing and Partnership Program

Master Coaching is more than just tuition in mathematics, English or any other subject. At **Master Coaching** we look at the total care for your child. Nurturing encompasses the gamut of educational experiences that shape the successful student; we are in partnership with our students with the sole aim for them to be their very best in all that they do.

1. Education.

Yes, we are an educational centre, and you can be sure that your child will be skilled in all the elements of a sound education. In mathematics we have over 6000 specially prepared sheets of mathematics covering all aspects of the topics needed for a coaching school.

We refer as our basis the relevant Australian syllabus.

Further, in mathematics, **Master Coaching** has developed unique methods of teaching topics that make mathematics easy to learn. These unique teaching methods are proprietary to **Master Coaching** and are used by all its coaches. Please see some of our unique methods elsewhere on this web page.

Learning should be fun, and the experience of learning should also be inspirational as well as fun. All our coaches at **Master Coaching** are very mindful of this duality of fun and inspiration and this has been factored into the experience that you will find in all our coaching sessions.

2. Confidence Building

We have always found that anyone in life will only achieve to a level that he/she realistically expects to achieve. This is where the personal touch comes into play in the coaching situation. No computer program or tape can inspire a student to the extent that a mentoring coach can.

All our coaching sessions are motivational sessions with the coach trained in our unique coaching techniques, gearing the session to growing the students self image. (see Psycho Cybernetics by Maxwell Maltz).

We start by praising your child for their efforts, not their achievements. It's a sad reality in schools today that often, **“children who need praise the most, deserve it the least, and are never praised.”** Praise builds confidence that builds success. At Master Coaching we will be praising your child for all his/her efforts and we will be asking you to support us in this strategy.

3. Fostering Better Relationships

We realise that the majority of your child's learning will be orchestrated through their school and we wish to support their school and add to the child's appreciation of all the work being done for them in the classroom situation. By encouraging the child to support their teacher in the classroom we are fostering a team building situation. By continually fostering good relationships children gain more respect their parents and siblings and we are continually being reminded at Master Coaching that some of our better results to the family are not just the academic ones.

4. Creating A Positive Future

It's amazing how many people think of coaching schools as cramming centres for the better student who is struggling for just a few more marks so that they may enter the elite schools or the elite courses in University. Certainly there are such students in coaching.

However, more and more parents are taking children to coaching to give them a successful experience so that they can leave school with the confidence that they can be successful in life. If you recall our philosophy, "All children have unlimited powers to achieve" but not all children want or need to go to university. Every child though will leave school, and need to have the confidence to challenge for their place in society. A good self-image can shield them from the world of hard knocks.

5. Attitude to Learning

When learning is enjoyable then the rate of learning increases dramatically. At Master Coaching we make learning enjoyable by praise and encouragement. We also explain the alpha learning techniques which will help students throughout their life. More than ever before the students of today will be locked in a continual learning situation throughout their lives as the rate of technological advancement accelerates. A positive attitude to learning is an essential part of preparation for a successful future.

6. Your Guarantee

At any stage during the first four weeks of coaching you may ask for a full refund of all monies paid and it will be refunded. (Not available to year 12 students). This is an unconditional refund for that period, but the refund does not apply beyond that time. We know that the genuine student enjoys a positive learning experience delivered by inspirational coaches.

When you enter our centre, reflect on our motto: Future Positive: that is the type of experience that gives every child the belief that they have unlimited powers to achieve.
